AHMED HOSSAM ELHOSSARY

Software Engineering | Mobile & AI Developer

01014060621 | ahmedelhossery22@gmail.com | Cairo, Egypt

linkedin.com/in/ahmed-elhossary | github.com/ahmedelhossary22

PROFESSIONAL SUMMARY

Software Engineering with practical experience in mobile application development using Flutter/Dart, AI and machine learning applications, and algorithm design. Certified Flutter developer with a portfolio of real-world projects spanning computer vision, AI-driven optimization, and cross-platform mobile apps. Seeking an internship or junior developer role to contribute to a high-performing engineering team.

EDUCATION

Bachelor of Science in Software Engineering (Expected Graduation: 2027)
Faculty of Computer and Information Sciences — Helwan National University

TECHNICAL SKILLS

Programming Languages: Python, Java, C++, C, Dart, SQL

Mobile Development: Flutter

Artificial Intelligence: Computer Vision, Gesture Recognition, Optimization Algorithms

Tools and Platforms: Git, GitHub

Core Concepts: Object-Oriented Programming, Data Structures, Algorithms, REST APIs

PROJECTS

Waste Classifier — AI Image Classification Application
– Developed a computer vision application to automatically classify waste types using deep learning models
– Categorized waste images into recyclable and non-recyclable groups to support smarter recycling decisions
Technologies: Python, Machine Learning, Computer Vision

Vehicle Routing Problem (VRP) — AI Optimization
– Implemented an AI-driven solution for the Vehicle Routing Problem using advanced optimization algorithms
– Applied operations research techniques to minimize delivery distances and reduce routing costs
Technologies: Python, Artificial Intelligence, Operations Research

Event App — Cross-Platform Mobile Application
– Built a full-featured Flutter mobile application for browsing, creating, and managing events
– Applied Flutter best practices including state management, clean architecture, and responsive UI design
Technologies: Flutter, Dart

Gesture Recognition — Real-Time Computer Vision System
– Built a real-time hand gesture recognition system enabling hands-free human-computer interaction
– Processed live video input to detect and classify hand gestures with high accuracy
Technologies: Python, Computer Vision, Machine Learning

CERTIFICATIONS AND TRAINING

Flutter Development Diploma June 2025 – November 2025
Route IT Training Center | Certified in cross-platform mobile development with Flutter and Dart

Automation Workflow with N8N Professional **July 2026 – December 2026**
Digital Egypt Pioneers Initiative (DEPI) June
